06/01/2017 · The I-35W Mississippi River Bridge in Minneapolis collapsed suddenly in August 2007. The official cause was attributed to gusset plates that were too thin and tore along a line of rivets. The issue: The plates had supported heavy traffic volume for 40 years. It took a secondary factor, the additional weight of construction equipment parked on the bridge at the time, to …

He spent six years at KARE-TV, the NBC affiliate in Minneapolis, and was the first reporter from his station on the scene of the 35W Bridge collapse in 2007. Joe also flew to Phoenix to cover the death of Minnesota Twins legend Kirby Puckett and took a couple trips to Washington, DC, so he could produce a documentary on a Minnesota soldier who lost his legs in Iraq. Perhaps …
